

CAPSULE COLLETS

Hardinge is the world's largest manufacturer of spindle tooling. Their workholding product line includes collets, chucks, spindle adapters, tool holders, bushings, collet blocks, indexers, rotary tables and custom workholding. Medical and pharmaceutical industries demand the high quality, high precision products that Hardinge is well known for. Capsule collets and over **40,000** other workholding products can be purchased direct from Hardinge.

**CAPSULE COLLETS - IN STOCK, FACTORY-DIRECT
FROM THE WORLD'S LARGEST MANUFACTURER OF SPINDLE TOOLING**

Hardinge, a global designer and manufacturer of machine tools and advanced workholding products, has been producing capsule collets for the world's leading capsule manufacturers for the past 50 years. These partnerships have resulted in state-of-the-art collets for the production of capsule bodies and caps in sizes of #00, 0, 1, 2, 3, 4 and 5. Hardinge precision, hardened and ground collets assure reliability and long life for the medical and pharmaceutical industries. A polished radius nose on the collet reduces friction and eliminates marking, while allowing you to take full advantage of your production capabilities with reduced downtime. Collets are 4-split or 3-split, depending on size. Hardinge also designs and manufactures custom gripping devices for turning, milling, grinding, process and assembly applications.
